## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-9, drawn to a recording method, classified in class 477, subclass 105.
  - II. Claim 10, drawn to a recording apparatus, classified in class 347, subclass 20.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the apparatus as claimed can be used to practice another, materially different process, e.g., an ink having a  $K_a$  value of more than  $3 \text{ ml/m}^2 \text{ msec}^{-1/2}$  (or a method whereby two inks (and not an ink and a processing liquid) are applied).
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
4. Should the invention of Group I be chosen, this application contains claims directed to the following patentably distinct species of the claimed invention:
  - a. A recording method comprising the steps of (1) ejecting onto a recording material ink having a  $K_a$  value of not more than  $3 \text{ ml/m}^2 \text{ msec}^{-1/2}$  and (2) applying a processing liquid thereto having a  $K_a$  value of not less than  $5 \text{ ml/m}^2 \text{ msec}^{-1/2}$  (claims 1, 4, 6, 7, and 9).
  - b. A recording method comprising the steps of (1) ejecting onto a recording material ink having a  $K_a$  value of not less than  $1 \text{ ml/m}^2 \text{ msec}^{-1/2}$ ; (2) applying heat to the ink and (3) applying a processing liquid having a  $K_a$  value not less than  $1 \text{ ml/m}^2 \text{ msec}^{-1/2}$  (claim 2).

Art Unit: 1774

c. A recording method comprising the steps of (1) ejecting onto a recording material ink having a  $K_a$  value of not more than  $1 \text{ ml/m}^2 \text{ msec}^{-1/2}$  and having a penetration property that increases with heat; (2) applying heat to the ink and (3) applying a processing liquid having a  $K_a$  value not less than  $1 \text{ ml/m}^2 \text{ msec}^{-1/2}$  (claims 3-7).

d. A recording method comprising the steps of (1) depositing ink containing a coloring material having a polarity onto a recording material and (2) applying to the ink a processing liquid having a polarity opposite from that of a coloring material (claims 8-9).

5. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 1774

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

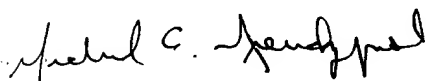

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

### *Conclusion*

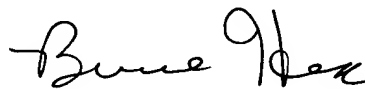

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael E. Grendzynski whose telephone number is 703-305-0593. The examiner can normally be reached on weekdays, from 9:00 am - 5:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Cynthia Kelly can be reached on 703-308-0449. The fax phone numbers for the organization where this application or proceeding is assigned are 703-305-5408 for regular communications and 703-872-9311 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-2351.
